SPECIMEN ・ DECK

Lokta

One cookbook's page system, ported to the screen.

After Cuisine on Screen ・ Prestel

Three voices

The system keeps a neutral grotesk, a paper-friendly mono, and an editorial serif.

- **Archivo** carries display and body
- **Spline Sans Mono** sets labels, folios, and figures
- *Source Serif* handles pull quotes

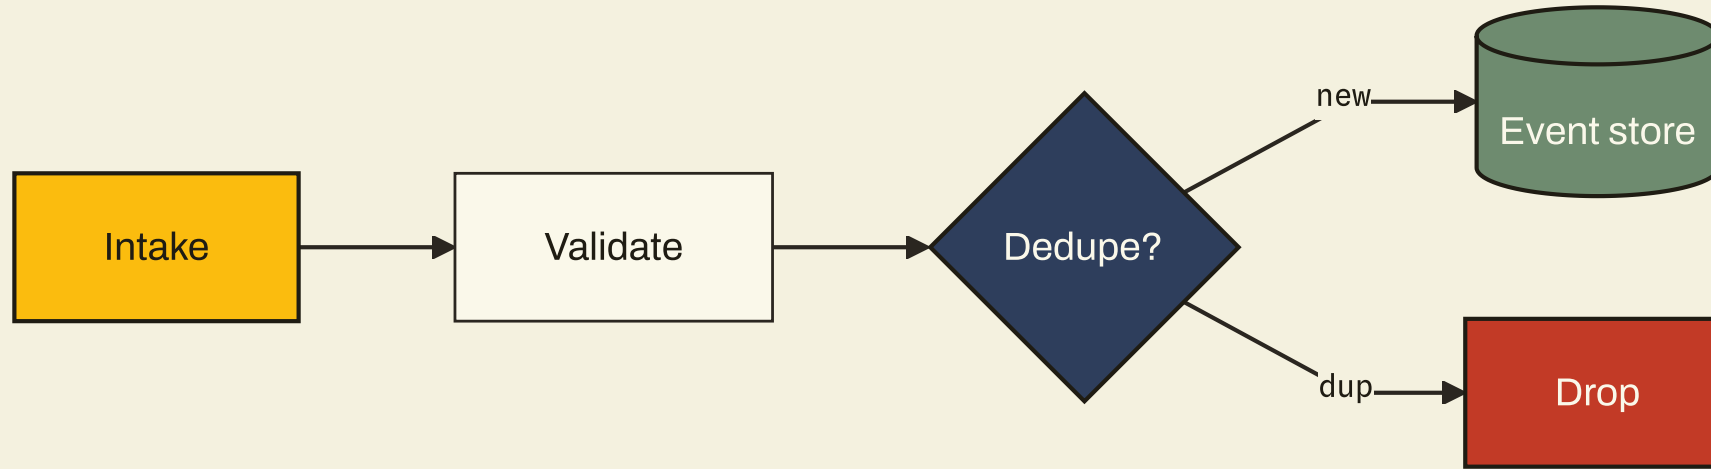

After Cuisine on Screen ・ Prestel

Pigment is a ground, not a tint

Marigold fills the film-opener spreads behind dark text, the way a still fills the page. Never as body color.

After Cuisine on Screen ・ Prestel

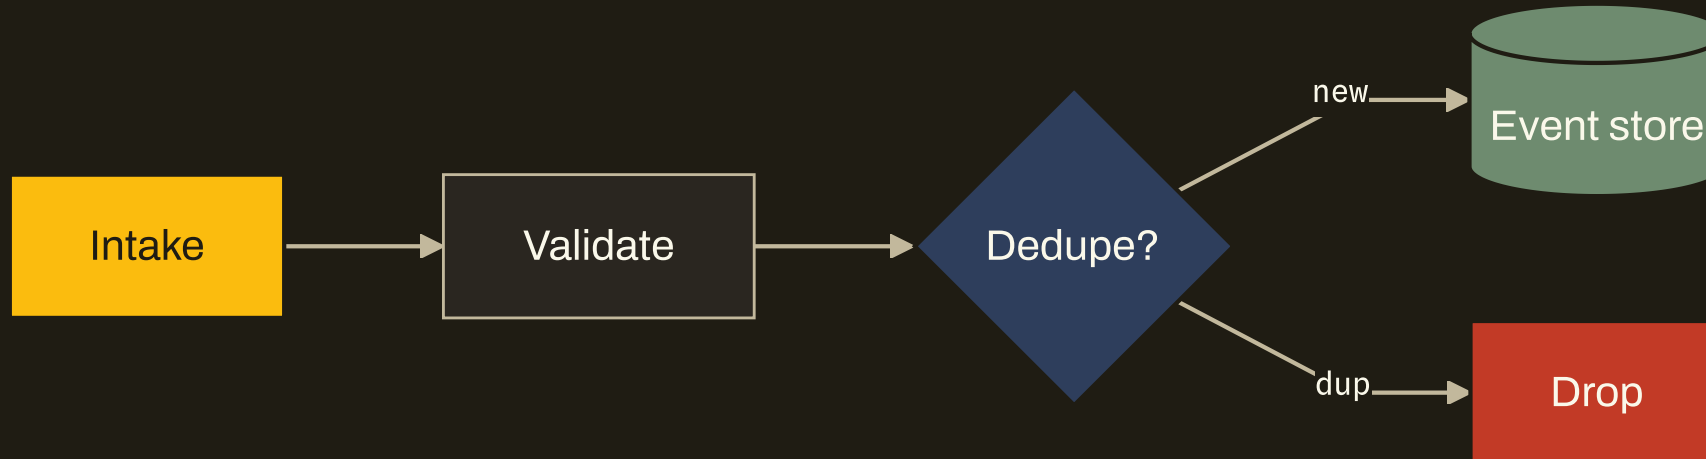

Diagrams have a house style

Square nodes, ink strokes, mono edge labels. The same theme renders on the web and into Typst.

After Cuisine on Screen ・ Prestel

The same diagram, on Ink

A dark stock re-themes the diagram: paper strokes and text on the Ink ground, with the pigments held.

Thank you
